# “LIFE”

(“*Omne vivum e vivo.*” - Louis Pasteur)

Life comes from life only

**Joint operation of life,  
‘self’ and consciousness**

1. Awakening
2. Awareness
3. Making choice beyond algorithmic pre-specifications

**Contribution towards  
functioning of ‘mind’**

1. Conversion of signal to information and vice versa
2. Emotional Response to Feelings
3. Changing logic modules of mind

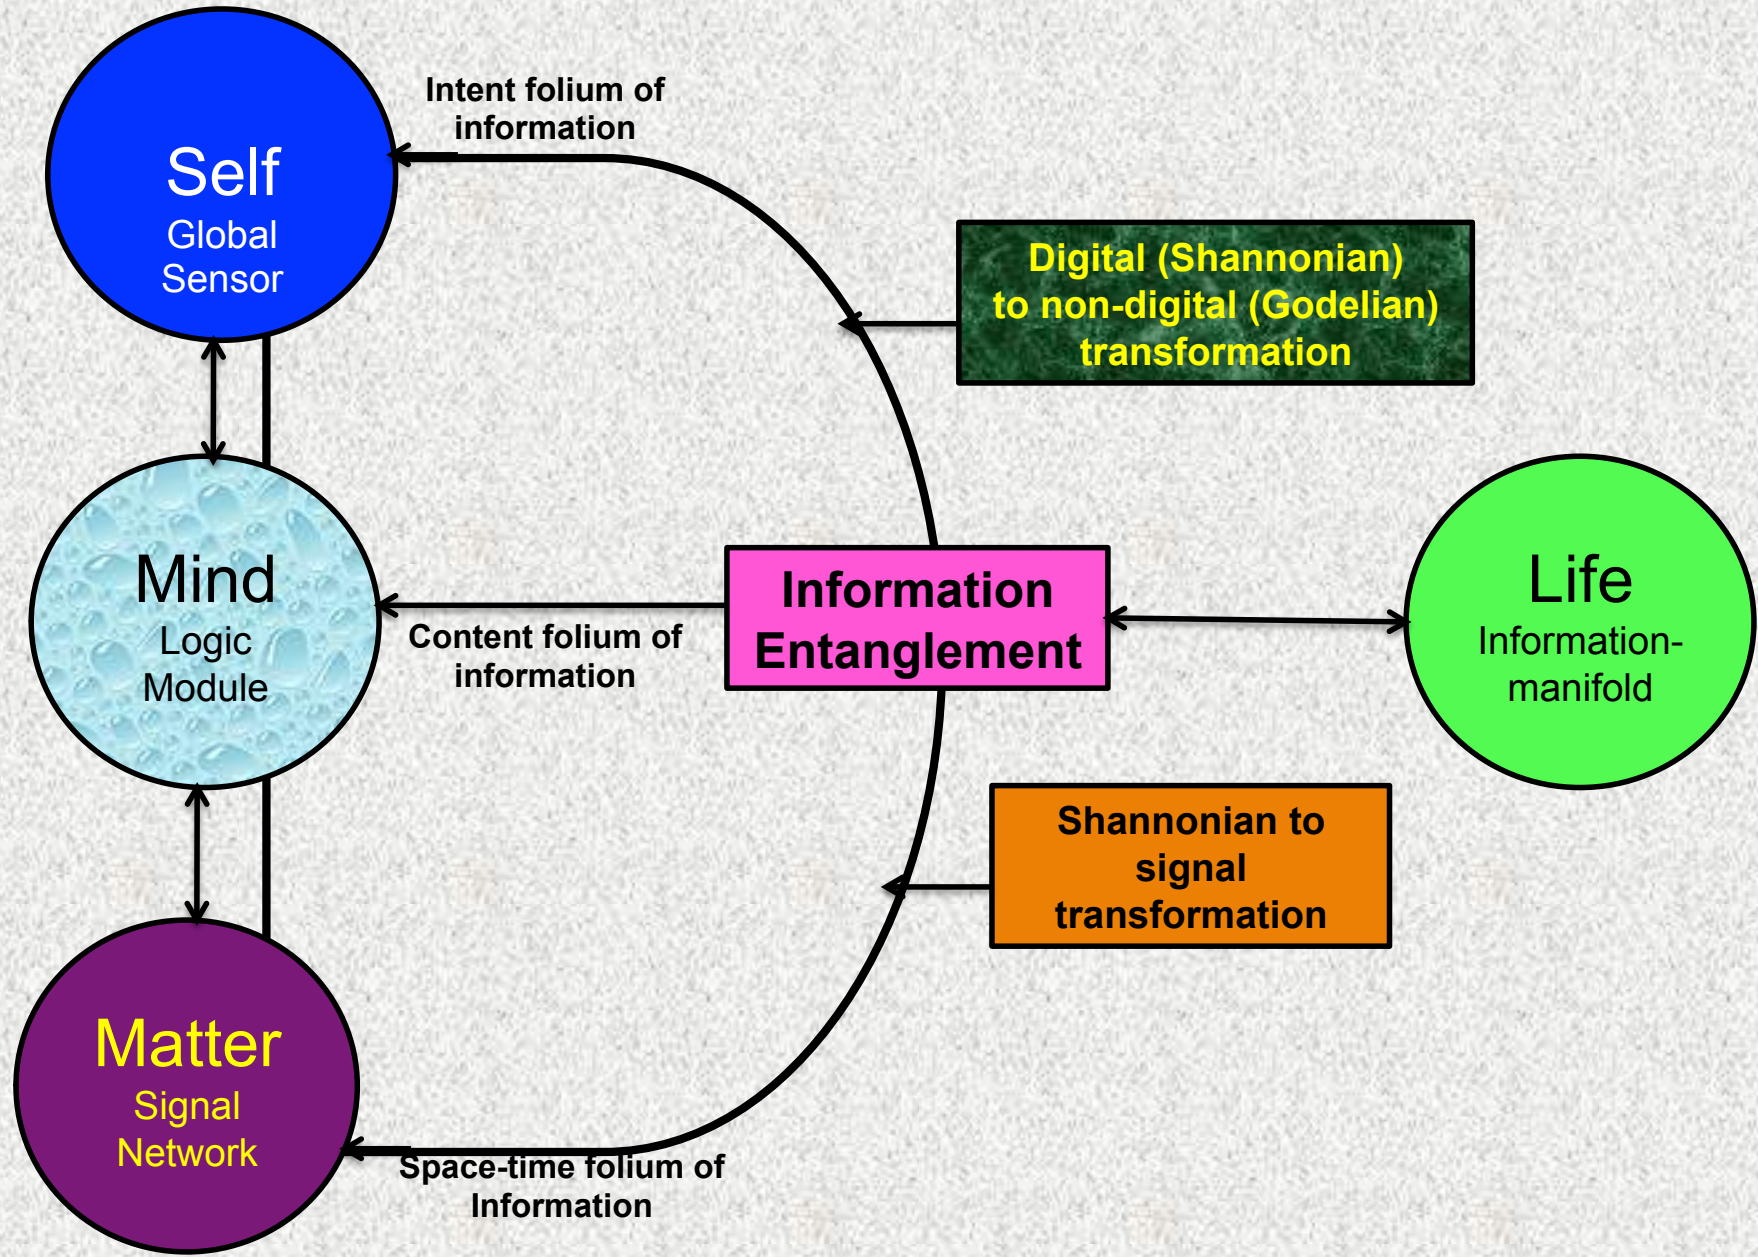

## Operations of Life

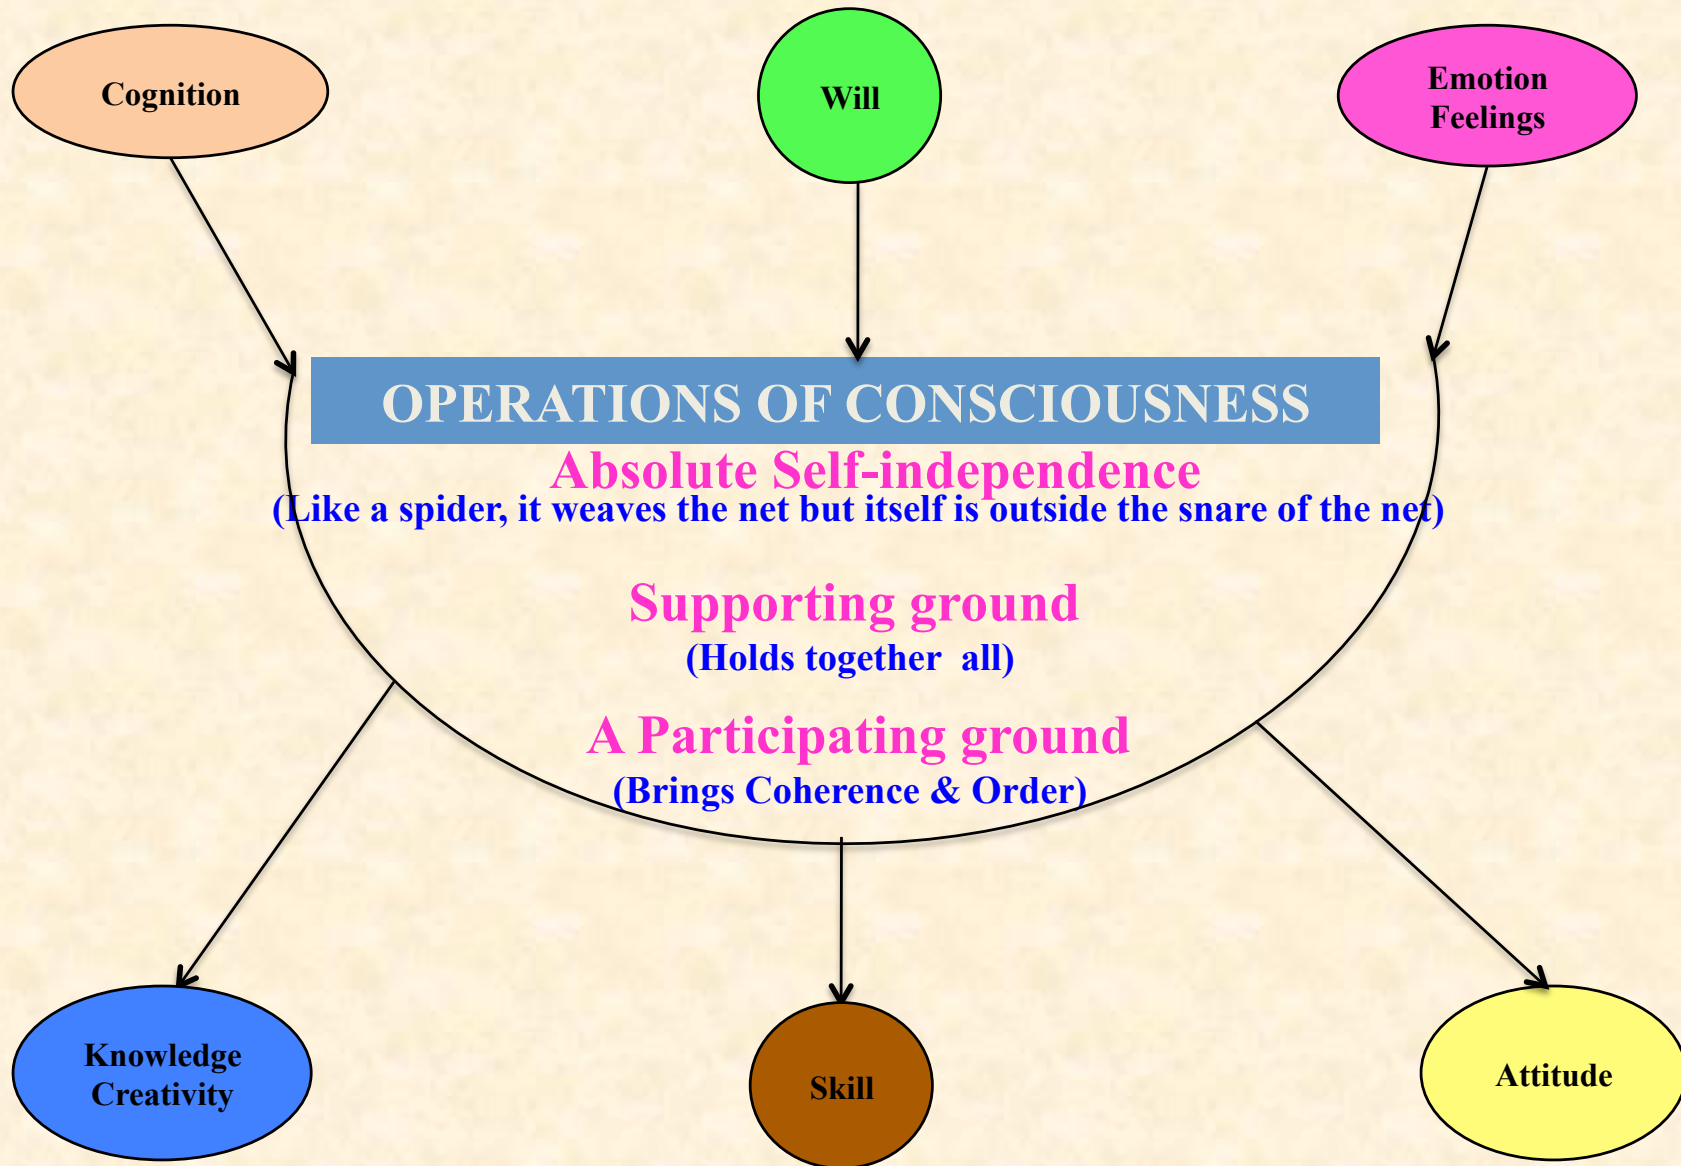

1. Uncertainty Management
2. Symmetry-Homeostasis: symmetry-sensing, symmetry-breaking, symmetry making
3. Access to Dark energy: Total energy Homeostasis

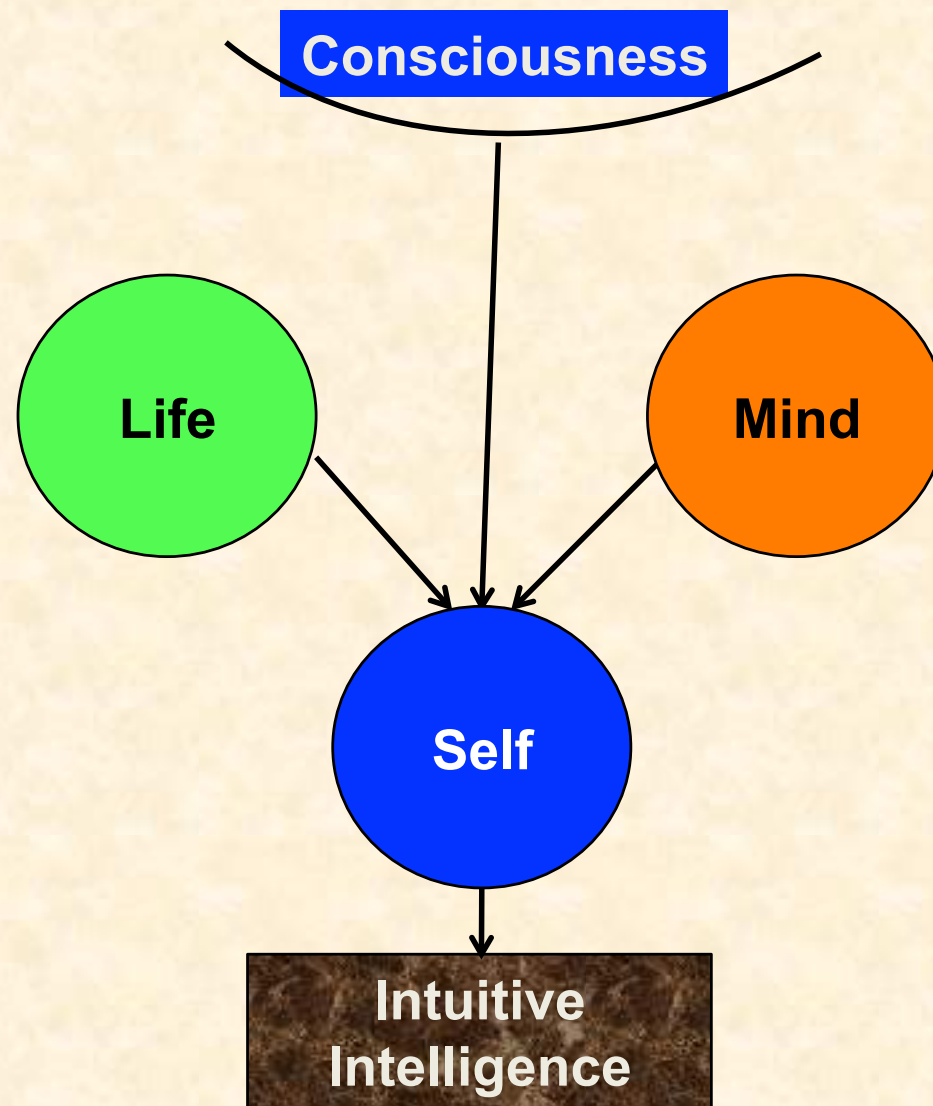

### Results

- (i) Spontaneity: uncoupled reactions
- (ii) Negentropy
- (iii) Information generation
4. Conversion of Digital to Non-digital, Quantity to Quality and Integration to Integral

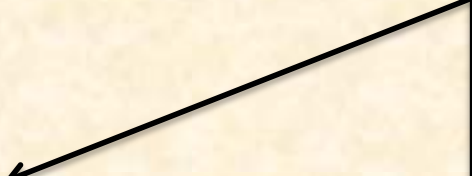

**Breakdown  
or  
Loss of Symmetry**

**Sensed by  
Life**

**Emotional Response**

**There is more of  
conditioned 'Self' (Ego)  
(Therefore, emphasis is on the cause of  
disturbance)**

**There is less of 'Mind'  
(Therefore, less receptivity to signal  
and less execution of decision)**

**The self is in touch with ground  
consciousness**
